

High-performance rear loader for professional milling operations.

Cold Milling Machine

W 50 Ri | W 60 Ri

The most powerful half-meter cold milling machine features an efficient operating concept at a working width of 20 in (0.5 m) or 2 ft (0.6 m).

Easy-to-use additional and automatic functions increase the machine's performance potential to quickly complete any milling job.

The LEVEL PRO **PLUS** leveling system fully integrated into the machine control system guarantees high-precision milling results.

The machine can be equipped with a large number of different milling drums, increasing flexibility and machine utilization.

The high-performance rear loading system can be flexibly adjusted for optimum loading of the milled material.

High-performance rear loader for
professional milling operations.

Highlights of the Cold Milling Machine at a Glance

04
05

1 | HIGH-PRECISION, INTUITIVE LEVELING WITH LEVEL PRO *PLUS*

- > Simple, intuitive operation
- > Fully integrated into the machine control system
- > Numerous new additional and automatic functions
- > Milling depth measurement via displacement sensors installed in the hydraulic side plate cylinders
- > Ultrasonic sensor in the extendable leveling boom on the left side of the machine

2 | EFFICIENT MULTI-FUNCTIONAL ARMREST

- > Ergonomically designed multifunctional armrest with color control panel
- > Additional machine height adjustment function built into the multifunctional armrest
- > Job data displayed on the control screen
- > User-programmable favorites buttons

3 | PERFECT VISIBILITY, COMFORT, AND ERGONOMICS

- > Optimum view of the side plates on the right and left side
- > High-quality camera / monitor system for viewing important working areas
- > Ergonomically designed comfort operator's seat including seat heater

4 | EFFECTIVE STEERING FUNCTIONS

- > Wide, offset front wheels
- > Front wheels have an extremely wide steering angle
- > Right-hand rear wheel features an automatic self-steering function

5 | DYNAMIC AND FAST MANEUVERING

- > Up to 7.5 mph (12 km/h) travel speed
- > Fast steering using the steering wheel
- > High-precision steering via joystick in multifunctional armrest
- > Ability to reverse with milling drum engaged

6 | QUICK-PIVOTING RIGHT-HAND REAR WHEEL

- > Rapid, automatic pivoting of the right-hand rear wheel without needing to lower the milling drum
- > Safe and secure locking in the end position
- > Extremely robust sliding bearing

10|

HIGHEST PRODUCTIVITY IN ITS CLASS

- > Impressive engine performance with maximum torque
- > State-of-the-art engine control unit for minimal diesel consumption
- > Three different milling drum speeds
- > Hydraulically switching power belt tensioner

9|

HIGH TRACTION THROUGH OPTIMIZED WEIGHT DISTRIBUTION

- > Variable additional weights up to 2,205 lbs (1,000 kg)
- > Machine has a particularly low center of gravity
- > Neutral, centrally located water and diesel tanks
- > High machine stability in three-wheeled and four-wheeled versions

8|

8|

HIGH LOADING CAPACITY FOR MAXIMUM PERFORMANCE

- > Extra large belt width of 14 in (350 mm) and cleat height of 1 in (25 mm) for high conveying capacity
- > Wide conveyor swing angles
- > Hydraulic folding conveyor for quick folding during operation on site
- > Quick-release coupling for easy mounting and de-mounting of the discharge conveyor

7|

OUTSTANDING PERFORMANCE THANKS TO SUPERIOR CUTTING TECHNOLOGY

- > Wear-resistant HT08 toolholder system
- > Minimal distance between the outer edge of the machine and the milled edge for small curbs
- > Hydraulically lifting side plates with proactive floating position to automatically lift on loose ground
- > Scraper lifted automatically via overload sensor
- > Scraper decoupled from the discharge conveyor for partial loading, even at maximum milling depth
- > Road sweeper for sweeping milled surfaces

Operating

Highlights

FOLLOW YOUR INTUITION

You will complete your job quickly and reliably. You will have everything under control thanks to simple, intuitive operation. You will be able to quickly familiarize yourself with the W 50 Ri / W 60 Ri. In addition, you will enjoy outstanding ergonomics, comfort, and visibility on the operator's platform. Innovative assistance systems make your day-to-day work easier - so you can fully concentrate on the milling process. Every job becomes child's play.

High-Precision, Intuitive **LEVEL PRO PLUS** Leveling System

08
09

When milling, it's important to remove the layers at the specified depth. WIRTGEN's intuitive **LEVEL PRO PLUS** leveling technology can be relied on to precisely maintain the specified milling depth.

SIMPLE, INTUITIVE OPERATION

The **LEVEL PRO PLUS** leveling system developed especially for cold milling machines offers easy and intuitive one-hand operation using the rotary knob, and the menu can be configured as desired. **LEVEL PRO PLUS** stands out due to its extremely precise milling results.

FULLY INTEGRATED

The **LEVEL PRO PLUS** leveling system is fully integrated into the machine control system, enabling a high degree of automation.

ADDITIONAL AND AUTOMATIC FUNCTIONS

The **LEVEL PRO PLUS** leveling system offers many automatic and additional functions that make the operator's job easier. This also speeds up work processes.

DISPLACEMENT SENSORS

The reference line is scanned via heavy-duty displacement sensors built into the hydraulic side plate cylinders and displayed directly on the high-resolution **LEVEL PRO PLUS** control screen.

LEVELING BOOM

The telescoping leveling boom with an ultrasonic sensor for scanning references located up to 6 ft 7 in (2.0 m) to the left of the machine guarantees perfect milling results, even when performing complex leveling jobs.

1 | LEVEL PRO PLUS
is synonymous with
perfect leveling
quality at high oper-
ating speeds.

2 | The leveling sys-
tem uses a variety of
different sensors.

3 | Easy operation
guarantees an
efficient leveling
process.

Efficient Multifunctional Armrest

10
11

The W 50 Ri / W 60 Ri is equipped with an efficient multifunctional armrest that not only speeds up processes and improves results, but also results in a more satisfied operator.

ERGONOMICALLY DESIGNED MULTIFUNCTIONAL ARMREST

The multifunctional, individually adjustable armrest combines innovative design with perfect user-friendliness. Important data is displayed on the color control panel. The multifunctional armrest is also precisely integrated into the universal operating concept for the entire WIRTGEN small milling fleet, and it enables productive working from the outset.

JOB DATA

Information like the weight and volume of the milled material, the size of milled areas, or the number of loaded trucks can be displayed automatically. This job data can be used to log daily performance.

FAVORITES BUTTONS

Four buttons can be programmed with 20 different functions as required by the operator.

ADDITIONAL HEIGHT ADJUSTMENT

The hydraulically proportional machine height adjustment including the milling depth memory feature is conveniently controlled via the multifunctional armrest.

1 |

1 | The operator has everything under control with just one hand.

2 | The ergonomically designed operator's platform with multifunctional armrest significantly increases the machine's productivity.

Perfect Visibility, Comfort, and Ergonomics

Perfect visibility, comfort, and ergonomics are factors that increase cost-effectiveness especially over the long term. Ultimately, they lead to greater productivity and profitability in every job.

PERFECT VISIBILITY

The optimized shape of the operator's platform not only offers an unobstructed view of the right side plate, but also the left side plate as well. In addition, the intentionally narrow chassis offers an unobstructed view of the right-hand milled edge, and the compact design of the discharge conveyor's suspension system ensures that the operator has a clear view of the milled surface behind the machine.

1 | *Ergonomic operation increases productivity.*

2 | *The operator always has an unobstructed view of the side plates on both sides.*

HIGH-QUALITY CAMERA / MONITOR SYSTEM

The camera / monitor system consists of two cameras and a heavy-duty monitor. The monitor provides a high-resolution view of the loading situation from the cameras at the end of the discharge conveyor and of the area in front of the milling drum housing below the machine.

COMFORT OPERATOR'S SEAT

The ergonomically designed, swiveling comfort seat with seat heater allows the operator to work in a relaxed manner. It also helps provide the operator an excellent view to the side and rear of the machine.

Driving and Steering

Highlights

ON THE ROAD TO SUCCESS WITH AN INTELLIGENT MACHINE

The ability to turn quickly in extremely confined spaces. Minimal milling radii. The ability to rapidly change locations. Milling and maneuvering on muddy ground. Day-to-day work on the milling site. Tried-and-tested WIRTGEN technologies immediately put your commands into action. Thanks to practical solutions, the W 50 Ri / W 60 Ri steps up to the plate. You overcome challenging situations while keeping cool and without losing any time.

Effective Steering Functions

16
17

The W 50 Ri / W 60 Ri is the most maneuverable cold milling machine in its class. Whether milling the tightest radii, turning in narrow sections, or driving around obstacles – the machine fully leverages its time-saving potential.

WIDE, OFFSET FRONT WHEELS

The wheels on the front axle are offset by 6 in (15 cm) (four-wheeled version) and drive “along one track” when the steering wheel is turned to the right. This optimizes driving onto obstacles and terrain edges. The extra wide front wheels also reduce surface load and wear.

EXTREMELY WIDE STEERING ANGLES

The extremely wide steering angles to the left and right guarantee small turning radii and thus rapid maneuvering, even in tight spaces.

AUTOMATIC SELF-STEERING FEATURE

When pivoted in front of the milling drum, the right- rear wheel’s automatic self-steering feature not only gives the small milling machine maximum maneuverability, but also minimizes tire wear.

1 | The machine's impressive steering angles make operations on narrow job sites easier.

2 | Offset front wheels make it easier to drive over obstacles and the edges of the terrain.

Dynamic and Fast Maneuvering

The W 50 Ri / W 60 Ri is also the fastest cold milling machine in its class. It is always the first to reach its destination when quickly and independently driving to the next job site:

1 | Precision steering guarantees precise handling.

2 | The small milling machine excels at fast maneuvering on narrow job sites.

FAST STEERING

In situations where the operator needs to steer particularly fast – such as maneuvering or turning – the machine can be steered as always using the steering wheel.

PRECISION STEERING

The highly responsive hydraulic steering system allows the operator to steer the machine precisely and smoothly, including via the right-hand multifunctional armrest.

MAXIMUM SPEED OF 7.5 MPH (12 KM / H)

The travel speed of up to 5 mph (8 km / h) (three-wheeled version) or 7.5 mph (12 km / h) (four-wheeled version) ensures that milling jobs can be completed particularly quickly.

ABILITY TO REVERSE WITH MILLING DRUM ENGAGED

The ability to reverse with the milling drum engaged makes it possible to maneuver quickly and easily on the job site.

Quick-Pivoting Right-Hand Rear Wheel

When pivoted in, the right rear wheel makes precise milling along obstacles such as curbs and walls possible.

AUTOMATIC PIVOTING

The right-hand rear support wheel can be pivoted in front of the milling drum hydraulically from the operator's platform to allow milling along curbs or other obstacles - without having to lower the milling drum to the ground. This process can be completed extremely quickly in 30 seconds or less. And since the milling drum is not in contact with the ground during the pivoting process, there is no risk of damage to the picks or the milled surface.

SECURE LOCKING

The secure and sturdy connection of the right-hand rear wheel to the chassis in the final position minimizes wear and increases precision.

EXTREMELY RUGGED SLIDING BEARING

The rugged, wear-resistant sliding bearing minimizes play in the kinematics, guaranteeing consistent, high-precision milling results.

1 | When pivoted in, the right rear wheel makes precise milling along obstacles such as curbs and walls possible.

Milling and Loading

Highlights

THE KEY TO SUCCESS

It takes innovative spirit to develop high-tech products. This has always been WIRTGEN's motto, and the company is committed to developing components that set standards. And the milling drum unit equipped in the W 50 Ri / W 60 Ri is one such component. It represents the perfect combination of expertise acquired over decades and groundbreaking technologies. In addition, you have numerous options and possibilities available when it comes to loading milled material with the W 50 Ri / W 60 Ri rear loader. All of them high-performance. All of them highly productive. All of them extremely fast.

Outstanding Performance Thanks to Superior Cutting Technology

Intelligent milling drum, side plate, scraper, and material depressor solutions make milling faster, easier, and increase its overall quality.

HT08 TOOLHOLDER SYSTEM

The newly developed HT08 toolholder system stands out thanks to its outstanding wear resistance and long useful operating life.

SMALL RIDGES

The extremely small distance between the right-hand milled edge and the outer edge of the machine leaves only minimal ridges.

HYDRAULICALLY LIFTING SIDE PLATES WITH PROACTIVE FLOATING POSITION

Overload sensors on the left and right side plates cause them to lift briefly to prevent them from sinking into soft ground.

AUTOMATIC SCRAPER LIFTING

Overload sensors protect the milling drum unit from damage by triggering the scraper to lift briefly, such as to avoid obstacles or uneven ground.

1 | The round milling drum housing ensures optimum material transport at milling depths of up to 8 in (210 mm).

2 | Many different milling drums are available, making a wide range of applications possible.

3 | The side plates can be raised hydraulically on both sides.

2|

DECOUPLED SCRAPER

The scraper is decoupled from the discharge conveyor, enabling partial loading even when milling at maximum milling depth.

ROAD SWEEPER

The sweeping unit attached to the front of the machine ensures that the milled surface is cleaned via circular brushes, enabling it to be milled precisely along an existing track.

3|

High Loading Capacity for Maximum Performance

A cold milling machine is only as good as its loading system. That's why the W 50 Ri / W 60 Ri features a milled material loading system that was designed for maximum performance.

WIDE CONVEYOR SWING ANGLES

Wide conveyor swing angles of 30° to both the right and left make it possible to easily load material, even in difficult job site situations.

14 IN (350 MM) BELT WIDTH AND 1 IN (25 MM) CLEAT HEIGHT

The extra large belt width of 14 in (350 mm) and cleat height of 1 in (25 mm) ensure a high conveying capacity.

HYDRAULIC FOLDING CONVEYOR

The hydraulic folding conveyor can be folded away quickly for easy transport and to adapt to site conditions.

QUICK-RELEASE COUPLING

The innovative quick-release coupling ensures that the hydraulic connections can be easily connected when mounting / removing the discharge conveyor.

1 | The small milling machine features high-performance, efficient loading of the milled material.

2 | Wide conveyor swing angles to both sides ensure that milled material can be loaded with flexibility.

3 | The folding conveyor reduces the machine's transport length.

4 | The quick-release coupling speeds up the process of mounting and removing the discharge conveyor.

Performance and

Productivity Highlights

SO POWERFUL AND YET SO ECONOMICAL

The small milling machine features concentrated potential in a compact package - for all of those minor maintenance jobs. Endless possibilities. Impressive performance. And equipped with groundbreaking technologies and efficient solutions. Even the environment benefits. Low emission levels protect operators and the environment. As the small milling machine proves, performance isn't a question of size.

High Traction through Optimized Weight Distribution

28
29

High traction is the key to high productivity. The perfect weight distribution of the W 50 Ri / W 60 Ri provides a constant, high level of traction in any job site situation.

ADDITIONAL WEIGHTS

The low net weight of the small milling machine in combination with variable additional weights up to 2,205 lbs (1,000 kg) makes a high operating weight, ideal traction, and smooth and easy transport possible, depending on the requirements.

PARTICULARLY LOW CENTER OF GRAVITY

The machine's extremely low center of gravity and its well-balanced weight distribution always ensure that it has excellent traction.

CENTRALLY LOCATED WATER AND DIESEL TANKS

Water and diesel tanks located in the middle of the machine ensure that its weight is distributed evenly between the axles and provide optimum traction, regardless of the fill level.

OUTSTANDING MACHINE STABILITY

The intelligently designed four-wheeled axle offers perfect maneuverability in any job site situation.

1 | Even highly demanding milling jobs are child's play thanks to the machine's outstanding traction.

2 | Additional weights and centrally located tanks ensure that the machine has outstanding traction in any application.

3 | The ability to easily transport the machine is a further benefit.

Highest Productivity in Its Class

30
31

Complete jobs up to 20% faster with maximum cost savings! The small milling machine's impressive engine performance and intelligent engine control play a major role in this respect.

IMPRESSIVE ENGINE PERFORMANCE

The maximum engine output with high torque guarantees fast, productive work, even at the maximum milling depth.

STATE-OF-THE-ART ENGINE CONTROL

The engine speed is controlled as required, keeping noise levels low and diesel consumption to a minimum. The cooling system with temperature-controlled fan speed also helps reduce noise emissions.

THREE DIFFERENT MILLING DRUM SPEEDS

Three different milling drum speeds make it possible to achieve unparalleled milling performance in a wide range of applications.

HYDRAULICALLY SWITCHING POWER BELT TENSIONER

The automatically engaging hydraulic power belt tensioner ensures that power is transmitted safely and effectively.

11

1 | The engine equipped in the W 50 Ri / W 60 Ri meets the US EPA Tier 4f exhaust emission standard.

2 | Excellent access to components makes servicing the machine easy.

3 | Under high load, the engine control system increases torque to ensure that milling performance remains high.

3 | W 50 Ri / W 60 Ri COLD MILLING MACHINE ENGINE CHARACTERISTICS (US EPA Tier 4f)

Machine Control and Leveling System		
LEVEL PRO PLUS leveling system right and left	☐	☐
RAPID SLOPE sensor for LEVEL PRO PLUS leveling system	☐	☐
Leveling boom including sensor for LEVEL PRO PLUS leveling system	☐	☐
Operator's Platform		
Comfort operator's seat incl. seat heating	☐	☐
Operator's platform with weather canopy and lateral weather protection elements	☐	☐
Monitor system with 2 cameras and screen	☐	☐
Track Unit and Height Adjustment		
4-wheel track unit	☐	☐
Precision steering by pushbuttons for machine with 3-wheel chassis (up to 5 mph (8 km / h))	☐	☐
Precision steering by pushbuttons for machine with 4-wheel chassis	☐	☐
Increased traveling speed (3-wheel up to 5 mph (8 km / h), 4-wheel up to 7.5 mph (12 km / h))	☐	☐
Miscellaneous		
Standard film coating in RAL 9001 (cream)	☐	☐
Film coating according to the customer's wishes	☐	☐
Model without WITOS FleetView	☐	☐
High-power lighting system LED including rotating beacon	☐	☐
Additional weight 838 lbs (380 kg) behind the front axle	☐	—
Additional weight 1,367 lbs (620 kg) on underbody	☐	☐
Milling drum assembly trolley for milling drums up to FB600	☐	☐
Electrical fuel filter preheating	☐	☐
Hydraulic connection for additional devices on the rear of the machine	☐	☐
Powerful hydraulic hammer with 32 ft 10 in (10 m) connection hose	☐	☐
Sweeping unit with disk brush	☐	☐
Pre-equipped for installation of Rumble Strip kit	☐	☐
Hydraulically driven water filler pump	☐	☐
Hydraulically driven pick extractor drift	☐	☐
Job data acquisition in the control display	☐	☐
License plate holder with LED lighting	☐	☐
